

Specialized Diverge Comp Carbon

While the real fun starts where the road ends, you still need a bike that'll get you there—one bike that shreds flowy singletrack, gravel, and traditional roads with equal authority. A more capable road bike won't cut it, nor will a more road-worthy 'cross bike for that matter. No, you need a dedicated gravel bike like the Diverge. First and foremost, it's fun and always down for a good time, but with a progressively-tuned Future Shock, our fast and stable Open Road Geometry, and plenty of tire clearance, it redefines the possibilities for adventure on a drop-bar bike.

Frame: Specialized FACT 9r carbon, Open Road Geometry, 12x142mm thru-axe, Future Shock Progressive suspension, 20mm of travel, flat-mount disc, BB386
