

Cube Aim SLX slateblack'n'black

Beauty is not limited to aesthetics alone. In fact, Aim owes its elegance to the smooth welds of the saddle and steering node. The threaded bottom bracket and internal cable routing ensure long life and ease of maintenance. The carefully considered geometry uses a low top tube to instill greater confidence and offers plenty of room to take advantage of the grip and comfort of wide tires. Last but not least, we have expanded the size range of our Size Split system, so that you can find the perfect Aim for you, regardless of your height.
